Downloading Installation Software

If you do not have an installation USB drive, your purchased DNASTAR software may be downloaded from our website.

1) Go to the [sign-in page](#) of the DNASTAR website. After signing in, you will be transferred to your Account pages. Click on the **Installers** tab:

2) Click a link or a globe icon () to download the software. Network installation requires download of both **License Server** software and **Windows/Macintosh Client** software. You may download the software to any location on your computer, but downloading to the desktop is usually most convenient.

Network License Server Installation

This section explains how to install and authorize the DNASTAR License Server software on a computer designated as a server. See [Network Client Installation](#) for information about installing the Lasergene software on individual user machines. These instructions apply to all DNASTAR products: Lasergene Core Suite, Navigator, SeqMan NGen, ArrayStar and QSeq.

Note: Administrator privileges are required to perform License Server installation.

Technical Requirements

For a list of technical requirements related to the network license server, please refer to our [DNASTAR License Server Technical Requirements](#) web page.
