---{Bugs}---
☐ Never had any
☑ Minor bugs
☐ Few bugs
☐ Can get annoying
☐ Ruining the game
☐ The game itself is a big terrarium for bugs
☐ Bad AI bots. You get more cars.. ♥♥♥♥♥♥♥t. A must have if you want to injoy what grid 2 dlc's have to offer. i bought this pack because i thought it could be used for single player but its NOT. AND it is not STATED that it is for single or online mode!!!!!. The GTR isn't available on single player mode.. The GTR didn't really stand out to me a that great a car and annoyingly you cannot customise the livery of this car for no obvious reason. Given that I bought the reloaded edition of the game for some things it is not clear if it is part of the base game of the DLC but the description seems to imply all you get here is the daytime version of tracks already in the base game. If that is the case I don't really see this DLC is worth the money.. This is good game, grid and drit is all. Utter♥♥♥♥♥♥from minute 1 . Dont waste your money or your life !. A DLC... you want it or not...

Can only be used online, and you can't upgrade it or modify it's livery in any way. Pretty big waste of money.. The GTR is like the most fun and easy to drive car in the game. Great DLC. Best of the rest.. Godzilla's a fun car and very accessible. The tracks are just reskins of other tracks so I'd say only guy this oen if its half off and you want the well-loved Nissan. I'll reccomend it but only for its sale price.. On sale for 75% off (for just $1.24), you get one car and day time versions of pre-existing maps. The day time maps are nice, but I feel like this should have been something that just came with the game anyways. Why have already avaliable maps with different lighting as DLC?

The Nissan GTR SpecV is a great car. It's very easy to drive and handles nicely and it's also pretty fast. Definitely one of the better Tier 3 cars. The only problem with it is that you cannot customize the car with your own liveries! Why Codemasters? This makes absolutely no sense to me at all. You only get 6 different options for different "stock" colors. That being said, it's still a great car though.

Also, this car works fine for me in Career and Custom Event (Singleplayer) modes. I don't know why other people are saying it only works in Multiplayer.. This car is great easily the best in Tier 3 and i dont know why other people are saying this car didnt come and its only online it worked for me and I have it in single player!
